SUMMARY

B.Tech in Computer Science (AI/ML) with strong foundations in Python, SQL, Data Structures, and Data Analysis. Experienced in working with databases, data visualization, and building data-driven applications. Skilled in extracting insights from data, creating analytical dashboards, and solving problems through logical and analytical thinking.

EDUCATION

B.Tech in Computer Science (AI/ML) , MVGR College of Engineering, Vizianagaram CGPA: 7.6/10	2022–2026 Andhra Pradesh, India
Intermediate (MPC) , Sriviswa Jr College, Visakhapatnam Percentage: 88.1%	2020–2022 Andhra Pradesh, India

SKILLS

Programming Languages	Python, SQL,
Data Analytics	Data Cleaning, Data Analysis, Data Visualization
Visualization Tools	Matplotlib, Seaborn, Plotly
Databases	MySQL, SQLite, SQL Querying, Joins, Aggregations
Core Concepts	Statistics (Basic), Problem Solving, Logical Reasoning, Data Structures, DBMS
Software Development Tools	Flask, REST APIs Git, GitHub

INTERNSHIPS

- AI-ML Virtual Intern:** EduSkills – Google for Developers **Jan 2025 – Mar 2025**
Completed a 10-week AI-ML Virtual Internship. Gained practical exposure to Artificial Intelligence and Machine Learning concepts. Worked on AI/ML-related learning activities and technical tasks.

PROJECTS

- Agricultural Yield Prediction:** Developed a farmer-friendly web application to predict the most suitable crop based on input parameters. Implemented supervised classification models including Decision Tree and Random Forest to improve prediction accuracy.
- Web Developer – MangoG.in:** Web Developer – MangoG.in: Developed and designed MangoG.in, an e-commerce website for online mango sales. Developed and designed MangoG.in, an e-commerce website for online mango sales. Focused on creating a user-friendly and responsive web interface. Supported farmers and distributors by enabling direct online sales. Worked on website development, UI design, and deployment.
- Online Cloth Bargaining Platform:** Developed an AI-powered web application using Flask and EfficientNetB3 to classify knee arthritis stages from thermal images. Implemented image preprocessing, model inference, user authentication, report management, and database integration. Analyzed medical image datasets and evaluated model performance using classification metrics and visualization techniques to support accurate predictions.

EXTRA-CURRICULAR

- Participated in National Hackathon “**Build Bharat Through AI**”, building an AI-based Smart Food Waste Management System.
- Worked in a 4-member team contributing to backend design, system development, and model integration.
- Presented the solution to industry experts and received recognition among top innovative projects.

CERTIFICATIONS

- IT Essentials – Cisco Networking Academy (2023) Learned computer hardware, software installation, networking basics, troubleshooting, and maintenance.
- Java Full Stack Development – TalentNext (Wipro), 2025 Completed training in Java Full Stack Development.
- Short-Term Internship on Google AI-ML – EduSkills, in collaboration with Andhra Pradesh State Council of Higher Education (APSCHE), 2025
- AI-ML Virtual Internship – EduSkills, supported by Google for Developers, 2025 Completed a 10-week virtual internship from January to March 2025.
